- c. You're home early today.

3 Read each passage and answer the question below.

1. Billy is 13 years old. He is a member of the basketball team. There are 25 members in the team, but only 10 can play in the basketball game next month.

One day, Billy saw a college basketball game on TV. The players were great. They could run very fast. Billy decided to run to school every morning to get stronger.

Q. Who could run fast?

- a. Billy's basketball coach.
- b. Billy's teammate.
- c. The basketball players on TV.
- d. Billy's friend.

2. This summer, Kate went camping by a lake with her family. They stayed in a tent. Kate's dad set up the tent. Kate picked up wood with her grandfather. They needed the wood to light the barbecue. After that, Kate cut vegetables and meat with her grandmother.

Q. Why did Kate pick up wood?

- a. To help her father.
- b. To build a tent.
- c. To cut vegetables and meat.
- d. To make a fire.

3. Jenny is a high school student in Canada. This winter, she went to Singapore. It was her first time to go there. She stayed with her uncle Chris for seven days. Chris and his family live in a big house with a pool. Jenny was surprised to see a pool at his house. Many houses in Singapore have a pool because it's hot all year.

Q. Why was Jenny surprised?

- a. Because Chris became rich.
- b. Because Chris lived in a big house.
- c. Because she saw a pool at her uncle's house.
- d. Because she heard most of houses in Singapore have a pool.

4. Yoko went to a zoo on a school trip. Her favorite animals were the red pandas. They were always moving in their house. Some pandas could stand up! But Yoko became sad when she thought about what the zoo keeper said; "The animals are dying out." She wanted to help them.

Q. Why did Yoko become sad?

- a. The red pandas didn't move.
- b. The zoo keeper had to go home.
- c. She couldn't talk to the zoo keeper.
- d. The animals are dying out.

4 Refer to the following passage and choose the answer that fits best.

Honeybees are capable of a highly developed form of communication. To understand how honeybees communicate, it is important to learn about their social organization first. The social organization in a colony of honeybees is based on a rigid division of labor. Each bee in the hive has a specific role to fill.

Honeybees live in large and amazingly well-organized colonies that consist of queens, drones, and workers. The queen's job is to lay eggs, as many as 2,000 in a single day! Each drone has a very important job: to mate with the queen. Drones, surprisingly, do not mate with the queen in their own hive. They travel, instead, to other hives, which may be miles away, to mate with the queens of those hives.

Worker bees neither lay eggs nor mate, but they do perform a variety of other essential jobs. These jobs include cleaning the hive, caring for developing bees, producing wax, building honeycombs, and locating and gathering food. When a worker bee reaches the age of three weeks, it begins one of its primary functions - hunting for food. Worker bees and drones support the hive.

A remarkable system of communication among the bees enables them to be successful in gathering food. In the hive, the bees communicate through touch, sound, and chemical messages. The process of chemical communication involves pheromones, odors produced by an animal that influence how other animals act. As they gather pollen, however, honeybees use a very different form of communication: a symbolic dance language. After locating a supply of food, honeybee "scouts" return to the hive and dance on the surface of the honeycomb. By dancing in a particular pattern and at varying speeds, the scouts communicate vital information about their find. The scouts indicate the direction in which the honeybees must go to find the food. They even relay information about the distance.

Although the world of the honeybee is filled with behaviors that humans find unique and interesting, none of these behaviors are as fascinating as the dance of honeybees. For entomologists, the scientists who study insects, the honeybees' ability to communicate through the dance provides a stimulating field of research.

1. Honey bees live ...
  - a. in colonies that are large and well-organized.
  - b. near by human colonies.
  - c. in unbelievably large forests.
  
2. When they become three weeks old, worker bees start ...
  - a. cleaning the hive.
  - b. caring for baby bees.
  - c. gathering food.
  
3. The worker bees' job is ...
  - a. to lay eggs.
  - b. to mate with the queen.
  - c. to support the hive.
  
4. When honeybees hunt for food, a highly developed form of communication ...
  - a. is very useful.
  - b. can be done only by queens.
  - c. often leads to mistakes.

Justin Jackson to Ryota Bunsugi

Subject: How's it going?

24 July, 12:31

Hey Ryota

I haven't heard from you since you arrived in Victoria. How are you getting on? Is the family you're staying with OK? What are your English classes like?

Write soon!

Simon

Ryota Bunsugi to Justin Jackson

Subject: Re: How's it going?

26 July, 11:20

Hi Justin

Sorry I haven't written until now. Since I got here I've been really busy with the course and making new friends. I'm speaking English all the time and going out in the evenings with my classmates. We're real mix of nationalities: Chinese, Russian, Thai, Italian, Spanish, Brazilian ... We talk in English but I'm learning loads about other languages and countries too.

My host family are really nice. The parents, Susan and Paul, are very friendly and kind. The children are called Lewis and Amy. They're both in primary school and are very sweet but they can be a bit annoying too. If I have to watch the film *Frozen* with them one more time, I'm going to crazy! I know all the songs by heart now. Ahhhh!

We live pretty near the school so I walk there every day. It's only a short bus ride from Victoria city center, and there are loads of shops and cafes there. There's a large museum too and we're going there on a school trip next week. Victoria is a really interesting place to be and there's a festival on at the moment. It's awesome but a bit expensive for us students, so we've been hanging out in the streets watching the free street performances from actors and musicians. Yesterday, I saw a magician doing card tricks – it was so much fun!

I'll send some photos of our school trip next time. Take care and let me know how you are doing.

Ryota

Question: Do the following statements agree with the information given in the e-mails? Write "T" if the statement agrees with the information, "F" if the statement disagrees with the information.

- (a) Ryota is now in Victoria.
- (b) Ryota is staying at Justin's house.
- (c) Ryota has been busy since he arrived.
- (d) Ryota strongly dislikes the host family's children.
- (e) Ryota has been to Victoria Museum.
- (f) Ryota thinks the street performances are expensive.

6 Look at the menu and answer the following questions.

- 1 When can you order the Lunch Special Combo?
  - a. At 11 o'clock on Saturdays.
  - b. At noon on Sundays.
  - c. At ten to two on Wednesdays.
